

MARGARET GLEW

Congratulations!

Dear Friend of Canadian Wildlife,

Congratulations, your outdoor space is officially certified as Wildlife-friendly Habitat by the Canadian Wildlife Federation! By including food, water and shelter and by maintaining this space in an earth-friendly manner, you are providing safe and important habitat for local and migratory wildlife.

We hope you take the opportunity to proudly showcase your wildlife-friendly garden to family, friends and neighbours with an attractive garden sign that you are now eligible to purchase! Buying a sign supports CWF's conservation education programs as well as raise awareness in your community of the importance and potential beauty of wildlife-friendly gardening. To purchase a sign: [Garden Habitat Certification](#)

Here is another way you might enjoy supporting wildlife:

- Document the wildlife that visit your outdoor space by taking photos with the iNaturalist Canada app or uploading digital photos at iNaturalist.ca. You don't need to know the species thanks to its photo recognition software and online community of knowledgeable people to help confirm identifications. In sharing your sightings, you contribute to our information of Canadian species and help conserve our natural world.

For more information, visit [GardeningforWildlife.ca](#). Love gardening? Join CWF's [#GardeningForWildlife](#) private Facebook group! Share tips and tricks with others.

We hope that your garden will bring you years of enjoyment and that you will continue to help wildlife in your outdoor space. Thank you for sharing your project with us.

Yours sincerely,

A handwritten signature in black ink that reads "Mike Bingley". The signature is fluid and cursive.

Mike Bingley
