

# HEALTH OF CANADA'S WATERWAYS

**STOP**habitatloss.org

**30,000+ DAMS  
ACROSS CANADA**

**250 DAMS HAVE  
FISHWAYS**

**WITHOUT REMOVING THOUSANDS OF BARRIERS AFFECTING FISH PASSAGE,  
CANADA WILL SEE IRREVERSIBLE NEGATIVE EFFECTS  
ON THE LIVES OF MANY SPECIES, SUCH AS:**

Salmon and trout, which will be unable to reach many of their historic habitats.

Freshwater mussels, which rely on fish to disperse their juveniles throughout rivers.

American Eel, killed in turbines as they migrate to spawn.
